

ORIGINAL HOOK AND SLOT BEAM IDENTIFICATION SHEET

AS ONE OF THE INDUSTRY FOUNDERS, RIDG-U-RAK HAS BEEN MANUFACTURING STORAGE RACK FOR OVER 70 YEARS. LONG BEFORE THERE WERE ANY CONVENTIONAL BEAM LENGTH STANDARDS, RIDG-U-RAK'S BEAM LENGTH DID NOT INCLUDE THE CONNECTOR HOOK THICKNESS (A 96" BEAM WAS 96 3/8" OVER THE HOOKS). STARTING JANUARY 2000, BEAM LENGTHS HAVE INCLUDED THE CONNECTOR THICKNESS (A 96" BEAM IS NOW 96" OVER THE HOOKS). IT IS NOW NECESSARY TO CONFIRM THE EXACT BEAM LENGTH TO INSURE COMPATIBILITY WITH EXISTING RIDG-U-RAK SYSTEMS.

ORDERS WILL NOT BE PROCESSED WITHOUT A BEAM SHEET (NOT REQUIRED FOR "TEARDROP" STYLE)
